

REEF INDUSTRIES, INC.

The Manufacturing Leader of Specialized Industrial Plastic Films Since 1957.

Griffolyn® LEED's Credit Opportunities LEED (Leadership in Energy & Environmental Design)

MR Credit 2.1 Construction Waste Management: Divert 50% from Disposal
1 Point

MR Credit 2.2 Construction Waste Management: Divert 75% from Disposal
1 Point in addition to MR Credit 2.1

Griffolyn® 10 mil and 15 mil films consist of high quality polyolefin/polyethylene resin and additives and therefore any materials that are not used on this project can be used on subsequent projects. Additionally, these materials are completely recyclable allowing the contractor to include the scrap in the diverted products group reducing the amount of material disposed of in a landfill. The most appropriate recycling classification code would be Code 04.

MR Credit 5.1 Regional Materials: 10% Extracted, Processed & Manufactured Regionally
1 Point

MR Credit 5.2 Regional Materials: 20% Extracted, Processed & Manufactured Regionally
1 Point in addition to MR Credit 5.1

The intent of this section is to use local materials minimizing transportation costs. The local area is anywhere within 500 miles of the project site. 100% of the components of the Griffolyn® 10 and 15 mil products are produced in Houston, Texas area.

SS Credit 3 Brownfield Development
1 Point

Construction on previously built sites occurs on a regular basis and is also occurring on sites in the past that would have been dismissed because of some sort of contamination creating an environmental concern. The extremely low permeability of the Griffolyn 10 and 15 mil films, in addition to its inert composition allows it to be considered for projects involving contaminated soils.
